VINE TWO

Special for Vine

Composition %w/w Potassium (K20) 14 Nitrogen (NO3) 4 Magnesium (MgO) 4 Zinc (Zn) 1,5 Iron (Fe) 0,3 Manganese (Mn) 0,1 Boron (B) 3,0 Molybdenum (Mo) 0,01

Benefits of VINE TWO

Promotes Fruit Set

Increases Yield and Sugar

Characteristics

VINE TWO is an appropriate combination of nutrients to supply vine the right nutritional balance in order to achieve the ideal grape ripening, improving properties such as: weight, color, homogeneity, etc...

Function of nutrients

- Magnesium (Mg) is an essential constituent of chlorophyll and enzymes that takes part in the energetic processes into the plants
- Zinc (Zn) is necessary in the protein synthesis and also in the growth regulation
- Boron (B) is required in the formation of cell wall, in the retaining flower too and finally in the development and pollen germination
- Manganese (Mn) and Molybdenum (Mo) are fundamental in photosynthesis as well in the nitrogen metabolism
- Iron (Fe) is directly related to production of chlorophyll

Application

FOLIAR

1-3 foliar applications during the spring from extended leaves until after fruit

DOSE: 1-2 Kg/ha (200gr/Hl)

FERTIRRIGATION

DOSE: 1-2 Kg/ha (200gr/HI)

Cautions

VINE TWO not mix with oils and alkaline products. It's better not apply into a mixture with copper salts, especially the most soluble like sulfate, hydroxide, carbonate, etc... In case mixing with copper, use the lowest dose of **VINE TWO** and apply the mixture immediately after the preparation.
