COMPLEX DENSO 15-10-30+Te+3Aa
COMPLEX DENSO 09-09-39+Te+6,7MgO
COMPLEX DENSO 18-11-59+Te+2MgO

Improves fruit sugar content and promotes fruit development and size

GEL Formulation

Neutral pH, unlike most liquid foliar that are highly acidic or highly alkaline. COMPLEX DENSO can be used at higher doses, not being aggressive with the cells that form stomas

More comfortable for the farmer to dosing per volume instead of on weight

Best solution in terms of speed and ease to use. Allow higher liquid dispersion homogeneity than solid products

Guarantee solubility by its GEL formulation

Adjuvant: promotes effectiveness of plant protection products when applied jointly

Multiple formulas for different crops and different stages of growth

COMPLEX DENSO is a formulated nutritional product and not just a simple mixture of raw materials, as are most of NPK fertilizers in powder form.

COMPLEX DENSO has an uniform and simultaneous solubility of all the nutrients, during use, while avoiding sedimentation in the storage containers of the nutrient solution. In contrast, common NPK water soluble powder fertilizers, which are produced through a mixture of raw materials, have increase variability in grain size that results in a non-uniform dilution of nutrients, since the smallest grains are dissolved firstly.

The conductivity and the salinity index are maintained in very low levels so that the soil will not be burndened with undesirable, salt concentration.

GREATER PERSISTENCE
BETTER UPTAKE
HIGHER EFFICIENCY
