

VINE ONE

Special for Vine

soil

foliar

Composition

%w/w

Potassium (K ₂ O)	21
Magnesium (MgO)	20
Sulfur (SO ₃)	42

Characteristics

VINE ONE is a highly concentrated fertilizer containing the nutrients:

Potassium, Magnesium and Sulfur, in sulphate form, in adequate rate. All three nutrients are readily water-soluble and immediately available to plants. VINE ONE ensures a high quality spread pattern due to its uniform particle size spectrum, enabling a precise distribution even at wide spreading widths. VINE ONE is free of Chlorine and has a low level of salinity.

Function of nutrients

- **Magnesium (Mg)** is an essential constituent of chlorophyll and enzymes that takes part in the energetic processes into the plants
- **Potassium (K)** Activation of enzymes – potassium has an important role in the activation of many growth related enzymes in plants.
- **Sulfur (S)** is a vital part of all plant proteins, and certain plant hormones

Application

FOLIAR

1-3 foliar applications during the spring from extended leaves until after fruit set.

DOSE: 1-5 Kg/ha (200gr/Hl)

FERTIRRIGATION

DOSE: 1-5 Kg/ha (200gr/Hl)

Cautions

Do not mix with oils and alkaline products. It's better not apply into a mixture with copper salts, especially the most soluble like sulfate, hydroxide, carbonate, etc... In case mixing with copper, use the lowest dose of product and apply the mixture immediately after the preparation.
