

COMPLEX DENSO

Fertirrigation / Foliar

BLUE GEL

YELLOW GEL

GREEN GEL

RED GEL

FERTILIZER

IMPORTED
FROM EU

Advantages

SONNE AGRO RECOMMENDS GEL FORMULATION INSTEAD OF NPK WATER SOLUBLE POWDER.

- 1 COMPLEX DENSO** It's a formulated nutritional product and NOT JUST A SIMPLE MIXTURE OF RAW MATERIALS, as are most of NPK fertilizers in powder form.
- 2 COMPLEX DENSO HAS AN UNIFORM AND SIMULTANEOUS SOLUBILITY OF ALL THE NUTRIENT**, during use, while avoiding sedimentation in the storage containers of the nutrient solution. In contrast, common NPK water soluble powder fertilizers, which are produced through a mixture of raw materials, have increase variability in grain size that results in a non-uniform dilution of nutrients, since the smallest grains are dissolved firstly.
- 3 THE CONDUCTIVITY AND THE SALINITY INDEX OF ARE MAINTAINED IN VERY LOW LEVELS**, so that the soil will not be burdened with undesirable, salt concentration.

Advantages

SONNE AGRO RECOMMENDS GEL FORMULATION INSTEAD OF NPK WATER SOLUBLE POWDER.

1

Neutral pH, unlike most liquid foliar are highly acidic or highly alkaline. COMPLEX DENSO can be used at higher doses, not being aggressive with the cells that form stomas.

2

More comfortable for the farmer to dosing per volume instead of on weight.

3

Best solution in terms of speed and ease to use. Allow higher liquid dispersion homogeneity than solid products.

4

Guarantee solubility by its GEL formulation.

5

Adjuvant: promotes effectiveness of plant protection products when applied jointly.

6

Multiple formulas for different crops and different stages of growth.

CHARACTERISTICS

Fertirrigation / Foliar

GREAT PERSISTANCE

BETTER UPTAKE

HIGHER EFFICIENCY
