

MELCRON

Botanical Biofungicide

COMPOSITION

%w/v

Soy Lecithin	28,00
Tea Tree Oil (<i>Melaleuca alternifolia</i>)	20,00
Vegetable Oils	22,00

CHARACTERISTICS

MELCRON is a broad-spectrum contact botanical biofungicide formulated with tea tree oil, soy lecithin and vegetable oils. The synergistic action of its natural-origin ingredients delivers effective, safe and sustainable protection against a wide range of phytopathogenic fungi.

MELCRON delivers broad-spectrum protection against a wide range of phytopathogenic fungi, including powdery mildew, Botrytis, Alternaria and downy mildew. Formulated with ingredients of 100% botanical origin, it provides a natural, safe and biodegradable solution that respects people, animals and the environment, while its multiple modes of action help minimize the risk of resistance development.

MODE OF ACTION

- 💧 **FUNGISTATIC AND FUNGICIDAL ACTION BY CONTACT.**
- 💧 **ALTERS THE STRUCTURE AND PERMEABILITY OF THE FUNGAL CELL WALL.**
- 💧 **SOY LECITHIN IMPROVES DISPERSION, COVERAGE AND PENETRATION.**
- 💧 **INDUCES NATURAL DEFENSE RESPONSES IN THE PLANT.**
